Welcome Message

by Isabella Huang-Loh

Chairman of the Board, Singapore Environment Council

Dear Students, Educators, Parents, and Environmental Enthusiasts,

We are thrilled to extend a heartfelt welcome to the annual School Green Awards (SGA), a celebration of passion, dedication, and environmental consciousness within our educational community. Today, we gather not only to recognize achievements but to inspire and empower the environmental leaders of tomorrow.

The SGA is not just an event; it is a platform where young minds come together to turn ideas into actions, to sow the seeds of change, and to foster a deep appreciation for our planet's well-being. This program, initiated by the Singapore Environment Council (SEC), has blossomed into a remarkable journey of transformation and enlightenment.

As we look back at the journey from its modest beginning with 28 schools to what it has become today, involving hundreds of educational institutions across various levels, it's evident that the commitment to sustainability is growing stronger within our youth. It is this collective dedication to a greener, more sustainable future that fills us with hope and optimism.

The SGA encourages students not just to understand the importance of environmental stewardship, but to actively engage in projects and initiatives that promote sustainability. Through their creativity, innovation, and determination, these young individuals demonstrate that every effort, no matter how small, contributes to a more eco-conscious and harmonious world.

So, as we embark on this exciting journey today, let's celebrate the achievements, big and small, of our students and educational institutions. Let's draw inspiration from their enthusiasm, their boundless curiosity, and their unshakable belief that they can make a difference.

To our students, you are the future custodians of our planet, and your actions today will shape the world of tomorrow. We are immensely proud of your commitment and dedication to a greener and more sustainable future.

To our educators, parents, and supporters, thank you for nurturing these young environmental stewards, guiding them, and instilling in them the values of responsibility and care for our environment.

Let's make this year's School Green Awards a celebration of not just achievements, but of the spirit of positive change. Together, let's continue to nurture and inspire these young leaders who will undoubtedly leave an indelible mark on our planet.

Thank you for being a part of this incredible journey towards a more sustainable and environmentally conscious future.

”

About SEC

The Singapore Environment Council (SEC) was established in 1995 as an independently managed, non-profit, non-governmental organisation (NGO). We are the only recognised member of the Global Ecolabelling Network (GEN) in Singapore. The GEN is a non-profit association of leading ecolabelling organisations worldwide. In 2018, SEC was granted United Nations Environment Programme (UNEP) accredited environmental NGO status. We influence thinking on sustainability issues and coordinate environmental efforts in Singapore and the region. We are an approved institution of Public Character (IPC) with tax exemption status to donors.

For details, please visit <https://www.sec.org.sg>.

An Overview of the School Green Awards

The annual School Green Awards (SGA) is a voluntary environmental programme which serves as a platform for students to develop and showcase their environmental efforts.

The Singapore Environment Council (SEC) launched the SGA in 2001 with only 28 participating schools. Since then, the SGA has grown to become one of SEC's landmark events. Every year, over 300 submissions are received from preschools, primary schools, secondary schools, junior colleges, international schools, institutes of higher learning and schools for students with special needs.

Participating schools organise activities that promote sustainable habits, aligned with the 5 pillars of the Singapore Green Plan 2030. They are encouraged to engage the wider community in their environmental efforts. By taking ownership and responsibility of their environmental projects, students are equipped with the skills and values to effect even greater change in the future.

Singapore Green Plan 2030

The Singapore Green Plan 2030 is a nationwide sustainability movement which aims to rally coordinated efforts to tackle climate change. It is jointly led by the Ministry of Education, the Ministry of National Development, the Ministry of Sustainability and the Environment, the Ministry of Trade and Industry and the Ministry of Transport.

There are 5 main pillars under the Green Plan which outline ambitious and concrete sustainability targets to be achieved by 2030. The SGA supports the Green Plan by encouraging participating schools to align their environmental projects with these pillars. Through this, youths can make positive contributions to the national agenda on sustainable development.

Key Pillars of the Singapore Green Plan 2030

1. City in Nature
2. Sustainable Living
3. Energy Reset
4. Green Economy
5. Resilient Future

GREEN PLAN

City in Nature

Green, Liveable and Sustainable Home for Singaporeans

- Plant 1 million more trees, and have every household within a 10-minute walk from a park by 2030 – more than 320,000 trees planted, and over 9 in 10 households are within a 10-minute walk from a park now
- Establish 500km of park connectors by 2030 – Park Connector Network is now 370km
- Develop over 130 ha of new parks, and enhance around 170 ha of existing parks with more lush vegetation and natural landscapes by end 2026

Sustainable Living

Reduce Waste & Resource Consumption

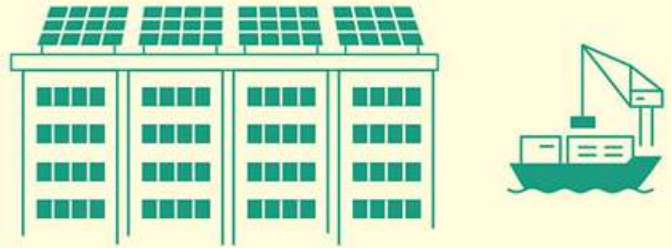

- Reduce amount of waste to landfill per capita per day by 20% by 2026, and 30% by 2030
 - E-waste Extended Producer Responsibility Scheme started with 3,500 tonnes of e-waste collected for recycling and extraction of valuable materials
 - Minimum 5¢ charge for disposable carrier bags to be implemented at larger supermarkets in mid 2023
- Reduce household water consumption to 130 litres per capita per day - smart water meters installed to empower users to track usage and save water

Strengthen Green Efforts in Schools and Institutes of Higher Learning (IHLs)

- IHLs will leverage their research and innovation capabilities to advance national sustainability goals, while preparing graduates and adult workers for opportunities in the green economy
- Eco Stewardship Programme Toolkit to be made available to all schools in 2022
- At least 20% of schools to be carbon neutral by 2030

Energy Reset

Implement Singapore's Energy Transition

- Increase efficiency of gas-fired power plants - S\$37m awarded under 1st Genco Energy Efficiency Grant Call; supported projects expected to reduce carbon emissions by over 48 kilo tonnes per annum; 2nd Grant Call projects to be awarded by 2H 2022
- Accelerate solar and energy storage deployment
 - Installed 561.8 MWp of solar (as of Q3 2021); on track to achieving solar deployment target of at least 2GWp by 2030
 - Working with industry partners to develop and test-bed innovative energy storage systems solutions, and develop local capabilities
- Facilitate growth of regional grid - working with partners to develop renewable resources in the region, and import up to 4 GW of low-carbon electricity by 2035; 3 trials ongoing

Sustainable Aviation and Maritime

- Launch Maritime Singapore Decarbonisation Blueprint, including targets for ports and harbour craft, Global Centre for Maritime Decarbonisation R&D initiatives, with additional \$300m funding
- Develop Singapore Sustainable Air Hub Blueprint by early 2023
- Contribute to reducing international transport emissions through the use of lower-carbon alternative fuels, starting with public-private projects and pilots

Greening Water Infrastructure

- Scale up research in blue energy at Changi Water Reclamation Plant in 2022, to potentially offset 0.5 kWh/m³ of total energy of desalination

- Increase solar capacity at rooftops of PUB's facilities by 12 MWp

Low-Carbon Built Environment

- Green 80% of buildings (by GFA) by 2030 - more than 49% greened so far
- 80% of new buildings (by GFA) to be Super Low Energy (SLE) buildings from 2030 - 7% of new buildings certified SLE in 2021
- Best-in-class green buildings to see 80% improvement in energy efficiency (over 2005 levels) by 2030 - 65-70% improvement achieved so far

Sustainable Towns and Districts

- Further reduce energy consumption in HDB towns by 15% by 2030
- Install solar panels at HDB blocks - implemented at 2,700 blocks
- Enable urban farming at rooftops of multi-storey carparks - tenders awarded for 16 sites
- Provide e-waste recycling bins and Light Emitting Surfaces signages to make HDB towns more sustainable

Cleaner-Energy Vehicles

- Reduce peak land transport emissions by 80% by or around mid-century
- All HDB towns to be EV-Ready by 2025
- 50% of public bus and taxi fleets to be electric by 2030
- LTA to take the lead to plan and finance electrical infrastructure upgrades needed at residential carparks
- Legislation on EV charging to be introduced in 2022

Green Economy

Jurong Island to be a sustainable energy and chemicals park

- ✓ Achieve at least 2m tonnes of carbon abatement per annum from low-carbon solutions by 2030
- ✓ Increase output of sustainable products by 1.5 times from 2018 levels, by 2030

Develop Singapore into a Sustainable Urban Destination

- ✓ Sentosa received Top 100 (Green) Destinations Sustainability Stories award in 2021
- ✓ Hotel Sustainability Roadmap to be launched

Develop Singapore to be a Carbon Services Hub

- ✓ Attracted 13 firms to set up or expand their carbon services offerings in Singapore in 2021

Develop Singapore to be a Leading Centre for Green Finance

- ✓ Harness technology to create digital and data platforms for ESG ecosystem (Project Greenprint)
- ✓ Deployed US\$1.8b through Green Investment Programme to catalyse greater green investment activity and expertise
- ✓ Established a S\$3bn Multicurrency Medium Term Note Programme and a Green Bond Framework to catalyse the flow of capital towards sustainable infrastructure projects (e.g. Tuas Nexus Integrated Waste Management Facility)

Anchor New and High-Quality Green Jobs in Financial Sector and Ancillary Services

- ✓ Support expansion of ESG capabilities of financial institutions and service providers
- ✓ Launched new Sustainable Finance Technical Skills and Competencies category in Institute of Banking and Finance's Skills Framework for Financial Services

Establish Singapore as a Leading Regional Centre for Developing New Sustainability Solutions

- ✓ Low-Carbon Energy Research Funding Initiative (FI) awarded S\$55m to 12 proposals, covering hydrogen and carbon capture, utilisation and storage
- ✓ S\$80m Closing the Resource Loop FI to encourage a circular economy approach of recovering and reusing resources
- ✓ \$64m in 'City in Nature' and 'Greater Sustainability' pillars under the Cities of Tomorrow R&D Programme
- ✓ S\$93m Research Centres for Clean Energy FI (Solar Energy Research Institute of Singapore, Energy Research Institute @ NTU and Experimental Power Grid Centre)

Resilient Future

Adapt to Sea-Level Rise and Enhance Flood Resilience

- Formulation of coastal adaptation plans for City-East Coast, Jurong Island and North-West Coast (Lim Chu Kang, Sungei Kadut and Western Catchment Reservoirs) by 2030

Keep Singapore Cool

- Moderate the rise in urban heat, such as with cool paint and by increasing greenery
 - Launched trial of cool paints to cool ambient temperatures ~130 HDB blocks in Tampines

Safeguard Food Security

- Develop the capability and capacity of our local agri-food industry to produce 30% of our nutritional needs locally and sustainably by 2030
 - S\$60m Agri-Food Cluster Transformation Fund launched to co-fund local farms' capital investments in productive and sustainable farming systems
 - New land and sea tenders to be launched on 20+10-year leases from end 2022 to facilitate long-term planning and investments

Jointly led by:

Scoring & Criteria

SGA submissions are judged on two equally weighted parts.

Part A

Part A is an environmental audit questionnaire which reviews schoolwide sustainable initiatives. This is used to track schools' environmental performance year-on-year.

Part B

Part B focuses on sustainable projects which advocate and create lasting impact for an environmental issue of the school's choice. An Assessment Committee grades all project submissions before shortlisting nominees for the Most Outstanding Environmental Project award. At the final stage of the judging process, the Steering Committee selects the winners.

The combined final scores from Part A and Part B will determine the flower tier award that participating schools receive.

15 www.sec.org.sg/sga

Overview of Best 3R Awards

The 3R Awards (based on the 3Rs – Reduce, Reuse, Recycle) recognise and reinforce the positive environmental effects which students and teachers learn about.

Formerly managed by the National Environment Agency (NEA) the award has since 2013 been administered by SEC. Later in 2016, the 3R Awards was then fully integrated into the SGA framework and continues to encourage everyone in schools to inculcate better waste management and enhanced recycling.

The winner of the 'Best 3R Award' will be determined directly from the schools' SGA submission and will be based on a similar scoring system as the SGA Part A Questionnaire.

Schools who have chosen to focus on Sustainable Living – Saving Resources for their environmental outreach project will stand a higher chance of achieving this title which recognises the overall best performance in the area of 3Rs. This award will only be awarded to one school per education level (i.e. pre-school, primary, secondary, etc.).

Best 3R Award Winners

Award Winners:

Level	School
Preschool	M.Y World @ Matilda Court
Primary	Qihua Primary School
Secondary	Yuying Secondary School
JC/IHL/CI	Republic Polytechnic
Special Needs	APSN Tanglin School

Overview of Outstanding Environmental Project Awards

The Outstanding Environmental Project Award is awarded to the school with the best submission from each school level.

This award represents the submissions that generated the most impact, excelling in environmental impact and community outreach. After every submission has been scored, the top scorers are presented to a separate committee to determine the winner for each level.

Outstanding Environmental Project Award

Award Winners:

Level	School
Preschool	PCF Sparkletots @ Nee Soon Central Blk 671 (DS)
Primary	CHIJ Our Lady Queen of Peace
Secondary	Pasir Ris Crest Secondary School
